## I've Been Caught Being Active Printing Directions

We have developed the sticker template on the following which schools can use to print their own stickers and to reward students when they are caught being active. The stickers can be printed on standard Avery Labels, size 5160 and prints well in color and B&W.

To print this PDF template on the labels correctly you will need to make the following print adjustment: Click print and then go to the Page Handling options. In that option box set the "page scaling" to NONE (See photo below). Then the PDF will print on the stickers correctly.
